### **PROJECTS**

#### **Project – Liaison Link(React Native)**

- **Team Size:** 6.
- **Technologies:** React native, .NET at backend
- **Module:** User.
- **Appstore:** <https://apps.apple.com/gb/app/mii-account/id1508557388>
- **Playstore:** [https://play.google.com/store/apps/details?id=com.liaisongroup.TempRE&hl=en\\_IN&pli=1](https://play.google.com/store/apps/details?id=com.liaisongroup.TempRE&hl=en_IN&pli=1)

**Description:** Developed a mobile app for NHS healthcare professionals to simplify daily workforce tasks. The app provides secure, single sign-on access to shift scheduling, compliance tracking, and team communication tools. By consolidating multiple systems into one platform, it helps staff manage schedules efficiently, reduce administrative workload, and focus more on patient care.

## **Project – VehicleHub (Flutter)**

- **Team Size:** 4.
- **Technologies:** Flutter, salesforce at backend.
- **Module:** User.
- **Appstore:** <https://apps.apple.com/us/app/vehiclehub-mobile/id1540033026>
- **Playstore:** <https://play.google.com/store/apps/details?id=com.vehiclehub>

**Description:** VehicleHub offers a powerful mobile application for performing vehicle damage inspections, generating estimates, and managing the customer vehicle repair process to completion and invoicing. Unlike many other solutions in the market, VehicleHub has customized Salesforce.com to provide desktop users with the ability to easily generate, view and report on inspection and/or repair cases in the field while integrating with the users often numerous pre-existing back office accounting, telephony, and other auto-industry process management systems.

## **Project – ProPharmacy (React Native)**

- **Team Size:** 4.
- **Technologies:** React Native .Net at backend.
- **Module:** User.

**Description:** Developed an all-in-one digital platform for private healthcare providers to manage prescription and medication delivery workflows. The system streamlines operations for private doctors, weight loss clinics, and specialist practitioners by simplifying prescribing, dispensing, and logistics. Focused on improving communication between clinics and pharmacies, the platform ensures patients receive medications promptly and discreetly, while significantly reducing administrative overhead for healthcare providers.

## **Project – Juniverse (Android Native)**

- **Team Size:** 1.
- **Technologies:** Android and PHP at backend.
- **Module:** User.
- **Playstore:** <https://play.google.com/store/apps/details?id=com.junivers&hl=en>

**Description:** Juniverse is fundamentally a virtual universe for the juniors. Juniverse drives on the philosophy of crafting a cosmos where juniors rule. Juniverse are proud to be the only digital platform which concentrates on the wholesome evolution for juniors.

## **Project – Medsfatafat(Android Native)**

- **Team Size:** 1.
- **Technologies:** Android and PHP at backend.
- **Module:** User.
- **Playstore:** <https://play.google.com/store/apps/details?id=com.medsfatafatapp>

**Description:** This is an e-commerce mobile application designed for ordering medicines online through an Android app. When a user opens the app, they must first select their location to view deals and featured products from nearby stores. The app can also automatically detect the user's location. After setting the location, the user is taken to the home screen. From there, they can choose the "Order Medicine" option. To place an order, the user must first select a store. Once a store is selected, they can browse and choose the medicines they need and proceed to purchase them. The app uses the Paytm payment gateway for secure and easy payments.

### **CERTIFICATION**

**Course Name:** Flutter Development 2021

**Course Provider:** Udamy
